**Hello Hiring Managers**,

I have a 4 years ( Honours ) degree in Software Systems development from Waterford Institute of Technology, now known as SETU. Through my degree program, I gained a solid foundation in Java, HTML, CSS, PYTHON, The principles and techniques of software development, including design patterns, software architecture, programming logic and development methodologies. I also completed several projects that involved developing and implementing full-stack Android Application, which gave me experience in both front-end and back-end development.

I am currently working at WP Engine as a developer support agent. In this role, I have gained over 3 years of valuable experience in Professionalism, Work Ethic, Strong internal communication skills, Being a team player and contributing to the teams performance.

This role has given me strong foundations to start with but I am seeking a developer position now to advance and gain industry valued experience under the right management. I am happy to start as an associate developer and grow with each task and project.

In addition to my technical skills, I am also a highly motivated and hardworking individual. I am eager to learn and grow as a developer.

For my final year academic project, I created an Android Application using JAVA, I would like to complete and publish this App one day so being under the right people as a JAVA developer will be a great help.

Video Demo for the project is available here https://www.youtube.com/watch?v=9MhwMc8V-Qw
